

```
`javascript import React, { useState } from 'react';  
import { View, TextInput, Button, FlatList, Text } from  
'react-native'; export default function TodoList() {  
const [task, setTask] = useState(""); const [tasks,  
setTasks] = useState([]); return (
```

```
{ setTasks([...tasks, { key: Date.now().toString(), text: task }]); setTask(""); }} /> {item.text}} /> ); }
```
